Dear colleagues!

Among many major social problems which resolving is a component of a housing state policy, the central place is taken by housing stock high-quality updating, creation of effective management structures, increase of level of comfort, architectural expressiveness and durability of housing for the purpose of the population well-being. Along with it the problem of ensuring availability of housing to a general population, improvement of quality and expansion of a set of the rendered housing-and-municipal services has to be solved.

The analysis of the existing condition of a housing-and-municipal complex causes the need of formation of the effective organization mechanism, economy and management of construction and real estate during all life cycle that will promote finally the steady growth of national economy.

Application of system approach to the organization of an effective control system of objects of municipal property at the level of local government, will allow to structure all spheres of investment and construction activity of the city and respectively to provide adoption of reasonable administrative decisions.

An important role in the solution of these tasks is played by scientific maintenance and training of the qualified specialists organizers, economists and managers of all levels conforming to modern requirements of the market.

The importance of these problems is so great that their discussion has to happen taking into account Russian and international practical.

We invite you to take part in work of the VII international conference "Management of life cycle of a real estate object: technology, examination, economy" which will take place on April 8-10, 2015 at National research university of FGBOU VPO "Moscow State University of Civil Engineer" to the address: Moscow, Yaroslavskoye shosse, 26.
