

Kiryanova Lyudmila Vladimirovna

Mathematical model of the porous-capillary body in construction materials. XXI International Scientific Conference on Advanced in Civil Engineering "Construction - The Formation of Living Environment" (FORM 2018). IOP Conference Series: Materials Science and Engineering. P. 8318.

About One Method for the Boundary Value Problem Eigenvalues Calculating for a Second-Order Differential Equation with a Fractional Derivative. International Journal of Modeling, Simulation, and Scientific Computing. P. 9112.

Presence of Basic Oscillatory Properties in the Bagley-Torvik Model. VI International Scientific Conference "Integration, Partnership and Innovation in Construction Science and Education" (IPICSE-2018). MATEC Web of Conferences. 9728.

One method for the boundary value problem eigenvalues calculating for a second-order differential equation with a fractional derivative. International Journal of Modeling, Simulation, and Scientific Computing. P. 10346.
