

Kozlova Irina Vasilyevna

- Model and mechanism of carbon nanotube stabilization with plasticizer;
- Specificities of the estimation of efficiency of investment and construction projects at various stages of their life cycle;
- Use of industrial waste in the production of foam concrete based on slag portland cement;
- Model and mechanism of stabilization of carbon nanotubes with plasticizer on the basis of sulfonated naphthalene formaldehyde resins;
- Ultradisperse slag suspensions aggregative and sedimentative stability;
- Stabilization of carbon nanotubes with superplasticizers based on polycarboxylate resin ethers.
