

Zorin Dmitriy Aleksandrovich

Dependence of the Structure of Cement Stone from the Dispersion of the Alumina Component;

Use sulfoferritic cements in construction;

Electricity costs for grinding of cement with expanding additives;

Interaction of the augercast micropiles with permafrost;

Corrosion-resistant cements based on sulfated clinkers;

Corrosion resistance of sulfated cements in carbonate and in carbonate-sulfate mediums;

Minerals of expansive and non-shrinkage sulfomineral cements.
